VERTICAL INTEGRATION

Our integrated production system allows full control of the products — from a field to a table

RAW MATERIALS

The highest quality grains are obtained predominantly from Polish farmers, and above all, they are tested in laboratories located at each collection centre.

FEED

We use the highest quality raw materials to produce feed mixtures, concentrates, premixes and mineral additives of a world-class quality, thanks to which animals grow properly and naturally.

GREEN FARMS AND CERTIFIED CONTRACT FARMS

Wipasz has its own Green Farms and cooperates with breeders whose farms are certified and under constant control of our veterinary service. With our own slaughterhouses, we slaughter 550 000 chickens daily.

POULTRY MEAT

Thanks to the advanced technology, we provide meat that complies with the highest quality parameters. It is healthy, safe for the consumer and fully traceable.

CONVENIENCE

In Międzyrzec Podlaski Poultry Plant we have two specialized, comprehensive technology lines where we can do all kinds of products. Wipasz's R&D Team develops new ideas which follow the demand of our customers.

WIPASZ IN NUMBERS

2 poultry plants

80 export approvals

5 feed plants

1 000 000 tons of feed per year

700 000 tons of grain in storage

DAILY CAPACITIES:

550 000 birds slaughtered

1 000 tons of chicken meat

100 tons of convenience products

We operate our own Scientific Institute 'Polish Chicken Research Center', where we continuously conduct research to improve the welfare and nutritional quality of chickens from our Green Farms.

Objectives of research conducted at the Center

- ✓ improving the production performance in conjunction with improving animal welfare and environmental protection
- ✓ setting trends in antibiotic-free chicken breeding
- ✓ creating business models for breeders — Non GMO, organic, antibiotic-free breeding
- ✓ offering consumers the highest quality chicken meat

The only such center in Poland

- ✓ the first facility of this scale in Poland
- ✓ one placement is about 12,800 chickens
- ✓ 8 study groups in one cycle — faster acquisition of knowledge
- ✓ each study group consists of 8 pens
- ✓ 200 chickens in each pen
- ✓ the largest experimental facility for broiler chickens in Poland
- ✓ possibility of confirming the results obtained in experiments at the Green Farms on a macro scale
- ✓ pro-environmental technical solutions
- ✓ Wipasz's integrated structure makes it possible to carry out experiments related to better production results for chickens and affecting the quality of the product for the consumer

The first brand, launched in 1994. Wipasz has three divisions: feed production, Green Farms, and chicken meat production. We produce over one million tonnes of feed and premixes for poultry, cattle, and pigs from the highest quality raw materials sourced predominantly from Polish farmers. We produce high-quality poultry meat in modern poultry plants. Our production is fully transparent and verifiable.

These are our own state-of-the-art broiler chicken farms where we raise chickens without the usage of antibiotics and provide the highest welfare for the chickens, including heated floors, natural light, and lower stocking density rates. At the Green Farms, we combine animal welfare, care for the environment, and concern for consumer health.

A brand of frozen, fully heat-treated convenience food. Our production capacity reaches 2,000 tonnes per month. Thanks to our R&D department, we are able to create any product tailored to the needs of customers.

Convenience foods made from only the best quality Green Farms Chicken. We strive for clean-label production, with no preservatives added. We offer personalized dishes intended for different customer groups by using specially developed recipes. We prove that simple meals do not have to be boring and can be easily prepared at home in just a few minutes.

QUALITY CONFIRMED BY CERTIFICATES:
